Do's and Don'ts

Nonprofit leaders, advocates and funders across the South offer some insights that will lead to greater and more sustainable impact for Southern philanthropic investments.

**DO** search for and fund Southern organizational leaders who represent the communities they serve.

**DON'T** assume formal education and nonprofit management capacity are necessary to engage one's community in an inclusive vision for a more just and sustainable future.

**DO** prioritize leaders and organizations that have the trust of their communities as represented in relationships and the influence to get people to show up and speak out.

**DON'T** burden your grantees with unreasonable goals and reporting requirements.

**DO** support Southern community leaders and organizations that are able to articulate how identity, history and politics combine to suppress the power and prosperity of their communities.

**DON'T** assume the community leaders and organizations most well-adapted to affecting systemic change in a given community are those already well-connected to political, economic and philanthropic power.

**DO** look for networks of collaboration, resource-sharing and co-strategizing that already exist.

**DON'T** rely only on established 501(c)3 organizations to leverage your Southern investments.

**DO** provide flexible, multi-year funding and capacity-building support.

**DON'T** treat your grantees like contractors.
